

## MMLA Defibrillator Fundraiser

The Merrymeeting Lake Association is asking for your help!

We would like to purchase and install defibrillators at locations around the lake that can be accessed by the public 24/7. At times, ambulance responses can be extended due to Merrymeeting Lake's rural location and for cardiac events every minute counts when life-saving intervention is needed. Early defibrillation can be critical to surviving sudden cardiac arrest, and providing access to these machines around Merrymeeting Lake could be a lifesaving measure.

Our immediate goal is to purchase and locate six AEDs with heated/cooled cabinets at a cost of approximately \$1,800 for each defibrillator/cabinet combination. There will be a minimal expense associated with annual maintenance of approximately \$50.00 per unit per year. Installation cost will vary based on location specifics. These user-friendly devices can be operated by people with minimal or no training, and we hope to offer CPR training in the future to enhance everyone's comfort with these devices. We ask you to consider a donation to the success of this project either online at [www.mmlake.org](http://www.mmlake.org) or by detaching and returning the form below with your donation. Working together, we'll make our community even safer.

Thank you!
